CAREER GOALS

Aspiring web developer and passionate about building responsive and user-friendly websites. I love building responsive, user-friendly websites and constantly learning new skills. Also enjoy working in teams to create innovative solutions. I have also worked on ML.

SKILLS & EXPERTISE

- Programming:** C, C++, Java, Python, JavaScript
Frontend & Backend: HTML, CSS, TailwindCSS, Bootstrap, Django
CMS: WordPress
Tools: VSCode, PyCharm, Eclipse, Google Collab, Git & Github, MS Word, MS PowerPoint
Language: Bangla(native), English
- Problem solving skills
 - Teamwork & Leadership
 - Dynamic Frontend Design & Backend Development
 - Data Visualization & Machine Learning
 - Natural Language Processing
 - Transformers, Text Classification, Sentiment Analysis

PROJECTS

- **E-Seba**
 - **Maze**
 - **Thesis work:**
I have worked on a study that proposes a BanglaBERT-based system for detecting depression in Bengali Facebook users by analyzing sentiment and behavior over several days. This research addresses the importance of behavioural patterns to improve mental health.
- **Tic Tac Toe**
 - **Smart Predictor**
- **SPC4:** A Bluetooth controlled 4-Wheeler that tracks solar for charging
